

Presents

HAZ-MAT DETECTION

In cooperation with the

Smith Detection and Dr Hazmat Inc.

Are presenting a hands on class simulated hot zone scenarios. The course will be a combination of equipment that you currently have and other tools that are available. 10 chemical samples will be processed using detection papers, multi-gas meters, infrared (FTIR) and Raman spectrometers, IMS trace detection, and GC/MS mixture analysis. Come see how all of the technology and equipment complements one another and how to optimally use it given its capabilities and limitations. Orthogonal detection - and accurate interpretation - is the foundation of sound hazmat response. Learn what tools to use that are on your truck to get you home SAFE!

DATE / TIME: March 29, 2017
0800-1700

LOCATION: High Country Training Center
0225 County Shops Rd, Frisco CO, 80443

COST: Free
