Class is limited to 25 students

HAZARDOUS MATERIALS AIR MONITORING COURSE

2 Day Class November 13-14, 2017

High Country Training Center— 225 County Shops Road (County Rd 1003), Frisco, CO 80443

This course is geared towards emergency response personnel who wish to acquire working knowledge and skills related to the use of and interpretation of information provided by hazardous materials air monitoring equipment. Upon completion of the course, the student will possess skills and competencies in making decisions as to selection, equipment limitations, interpretation of data, and sample collection for lab analysis. This class includes hands-on field exercises using skills and knowledge obtained in this course. Students will work in small groups to ensure maximum involvement and participation in the class. The experience will heavily involve live application of the material learned during this exciting 16-Hour course.
