

Front Range Fire Consortium - Mass Casualty
Victim Tracking & Command Automation

Attention Front Range Fire Consortium

Are you prepared for the unthinkable?

Tragically, mass casualty incidents (MCI) like Vegas, Parkland, and Borderline have become part of our playbook; but the sheer volume and complexity continues to stretch the limits of our command processes - new command automation can help.

Join us on December 12th to discover how command automation for the iPad is changing incident management. We'll have a LIVE MCI exercise at *Greeley Fire Department's Station 1 Training Room* where you can discover first-hand the benefits of Incident App Solutions' App for the iPad. You'll actually use their new ZoneEMS App on your iPad to track victims as a treatment officer and see how trauma counts and hospital transports automatically feed into an incident command dashboard. ***What's more, you get to keep the ZoneEMS App!***

- EVENT - Mass Casualty Victim Tracking & Command Automation

- WHEN - December 12th - 12:00 - LUNCH PROVIDED
- WHERE - Greeley Fire Department - Station 1 - 1155 10th Avenue
- Incident Apps will contact you with App loading instructions

RSVP NOW

Greeley Fire Department - 1155 10th Avenue - Kevin Maloney, B.C.
