

"Tricks of The Truck"

Division Chief Paul Capo

Truck Company Operations

Saturday, February 15, 2020
08:00 – 17:00

Hosted by the
Estes Valley Fire Protection District
\$60 with lunch provided

In order to increase scene safety and productivity, Truck company operations is a must! It doesn't matter if a designated Truck company or members from another apparatus completes these essential tasks, what matters are those members need to be trained in the most efficient manner possible.

This 1-day seminar will teach all six positions of the Truck Company. Those include; the *Company Officer, Irons, Can, Driver Operator, Outside Vent and Roof position*. We understand that all positions might not be filled, but when your members work at different locations of the fire building, they assume those respected job assignments. This course will explain tangible and safe ways of accomplishing tasks by splitting crews in order to increase productivity.

In addition, you will learn the tricks of the trade in regards to *Conventional Forcible Entry, Unconventional Forcible Entry, Through the lock, Ground Ladders, Multiple Search tactics, Civilian Rescue, Flat and Peaked Roof Ventilation, Overhaul, enlarging openings, and more*. After this course you will have an understanding of the roles and tactics that will increase the productivity and safety on your fire scenes with less radio traffic.
