

RISK-BASED RESPONSE TO BATTERY EMERGENCIES

8-Hour On-Site Instructor Led Workshop

COURSE DESCRIPTION:

This instructional 8-hour course include classroom and hands-on training to prepare responders to conduct risk-based response to battery emergencies for multiple types of batteries including Lithium-Ion (Li-Ion).

The course covers batteries found in transportation including passenger vehicles, ground transport, air and sea shipping, as well as residential, commercial, and industrial settings.

COURSE TOPICS:

- Battery construction and chemistry
- Recognition and identifying
- Understanding direct current (DC)
- Battery hazard and risk assessment
- Recognizing and responding to thermal runaway
- Response considerations
- Air monitoring
- Battery fire strategy and tactics

ER-PLAYBOOK

HAZARD3 training courses including on-site, virtual instructor led training (VILT), and microlearning are supported by our Emergency Response Playbook guides.

Attendees will receive Technical Guides and/or Equipment Guides to serve as job-aids during a risk-based response.

Training includes hands-on battery assessment, power shut down, and mitigation using Hazard3 props.
