

2-Day Fire Studio Workshop

August 18 & 19 Hosted by the City Greeley
Fire Department and IT Services

1001 11th Avenue, Third Floor IT Center, Greeley CO

Day One: Fire Studio Essential Training

- Understanding the slide panel layout and functions
- Understanding the library panel layout and functions
- Creating and working with libraries
- Importing photos, video, and layers
- Creating a single view simulation
- Creating and saving custom layers
- Loading, saving, and exporting simulations
- Editing animated and evolving layers
- Using the masking tool
- Pan and Zoom with the 2D Camera
- Creating a multi-view simulation
- Creating instructor led and self-playing simulations

Day Two: Advanced Simulation Training

- Creating multi-unit simulations
- Using simulations in performance-based assessments
- Advanced simulation design and development
- Photography and basic photo editing
- Creating custom clip art
- Working with video files

2-Day Workshop Cost: \$550

Each student will receive more than seven gigabytes of clipart images, Fire Studio animated layers, sound files, and sample simulations.

We will be covering Fire Studio versions 6.2, 6.5, and 7 in the class.

Workshops are led by Ted Nee a certified Fire Studio Master Instructor with more than twenty-five years of experience creating fireground simulations using the Fire Studio authoring software.
