### **Featuring Shane Ray President National Fire Sprinkler Association**

The "Big Box" store has gotten bigger. There was a time, not too long ago, when we considered a 150,000 sq ft Wal-Mart Supercenter to be a big commercial building. Today, the size occupancy pales in comparison to the mammoth fulfillment centers that exist all over the country. Sizes range from the paltry 600,000 sq ft to well over 1,000,000 sq ft and they just keep getting bigger.

Join us for a two-day Big Box Workshop where we take an in depth look at the proliferation of these new buildings and examine their impact on the fire service. There will be lively discussions from those with experience along with an opportunity to put the ideas into actions during a stirring round of big box simulations.
