Course Description:

ICS-300 provides an in-depth focus on the NIMS Incident Command System (ICS) that includes the tools, practices, and procedures that are available in ICS to effectively manage emergency incidents or planned local events at a local Type 3 level.

ICS-400 provides training and resources for responders who require advanced application of the ICS by providing overall incident management skills rather than tactical expertise. Expanding upon information covered in ICS-100 through ICS-300 courses, ICS-400 emphasizes large-scale organizational development, roles and relationships of the command and general staff, and planning, operational, logistical, and fiscal considerations related to large and complex incident and event management. The course also describes the application of Area Command and the importance of interagency coordination on complex incidents and events.

Target Group:

ICS-300: Individuals who may assume a supervisory role in incidents. Note: During a Type 3 incident, some or all the Command and General Staff positions may be activated, as well as Division/Group Supervisor and/or Unit Leader level positions. These incidents may extend into multiple operational periods.

ICS-400: Responders who will serve as command or general staff in an ICS organization, select department heads with multi-agency coordination system responsibilities, area commanders, emergency managers, and multi-agency coordination system/emergency operations center managers for expanding or Type 3 incidents.
